

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCIENTIFIC BOOKS

METEORITES

Their Structure, Composition and Terrestrial Relations.
By Oliver Cummings Farrington, Ph.D., Curator of Geology,
Field Museum of Natural History, Chicago.

This work gives a complete and accurate account of the present knowledge of Meteorites and embodies the results of the latest researches on the subject. "This volume will at once interest the intelligent amateur and be of value also to the trained specialist." American Journal of Science.

Pp. x+233; 65 illustrations. Price \$2. Postage extra, 2 lb. rate.
For sale by COLONIAL PRESS, 1510 East 56th Street,
Chicago, Illinois.

MODERN PROBLEMS OF BIOLOGY

Lectures delivered at the University of Jena. By CHARLES S. MINOR, S.D., LL.D., Professor of Comparative Anatomy, Harvard University Medical School. Author of "A Laboratory Text Book of Embryology." 53 illustrations. 8vo. Cloth, \$1.25 postpaid.

P. BLAKISTON'S SON & CO.

Philadelphia

THE MEANING OF EVOLUTION

By SAMUEL C. SCHMUCKER, Professor of the Biological Sciences in the West Chester State Normal School.

An attempt to give to people whose training is other than scientific some conception of the great story of creation. Pp. viii+298.

The Macmillan Company, New York

A NEW ERA IN CHEMISTRY

By HARRY C. JONES, Professor of Physical Chemistry in the Johns Hopkins University.

Some of the more important developments in general chemistry during the last quarter of a century. Pp. xii+326. \$2.00.

New York, D. Van Nostrand Company

AN ILLUSTRATED FLORA OF THE NORTHERN UNITED STATES AND CANADA AND THE BRITISH POSSESSIONS

By NATHANIEL LORD BRITTON, Director-in-Chief of the New York Botanical Garden, and the Hon. ADDISON BROWN. The aim of this work is to illustrate and describe every species, from the Ferns upward, recognised as distinct by botanists and growing wild within the area adopted. In three volumes, illustrated. Pp. xxix+680; iv+735; iv+637. Charles Scribner's Sons, New York

A HANDBOOK OF MEDICAL ENTOMOLOGY

By WM. A. RILEY, Ph.D., and O. A. JOHANNSSEN, Ph.D., Cornell University.

A new and up-to-date account of poisonous and parasitic insects and their allies, especially those that transmit and disseminate disease. Illustrated. Keys for identification. Cloth, 350 pages. Price \$2.20 postpaid.

CHARACTER AND TEMPERAMENT

The Psychological Sources of Human Quality

By JOSEPH JASTROW, Professor of Psychology, University of Wisconsin.

(Conduct of Mind Series)

D. APPLETON & COMPANY. 1915

The Diatomaceae of Philadelphia and Vicinity

By CHARLES S. BOYER, A.M., F.R.M.S.

A description of the diatomaceous flora of Philadelphia and the region within a radius of one hundred miles, including the pre- and post-glacial deposits occurring in the blue clay of the ancient Delaware River has just been issued in book form by the J. B. Lippincott Company. 143 pages. More than 700 original illustrations, enlarged 800 times, with complete index. Size 9x12. Bound in Art Vellum cloth. Sent postage paid \$5.00.

Address Charles S. Boyer,
6140 Columbia Avenue Philadelphia, Pa.

THE INFLUENCE OF MONARCHS

Steps in a New Science of History

By FREDERICK ADAMS WOODS, Lecturer in Biology, Massachusetts Institute of Technology.
"The historiometry of Dr. Woods is in principle a legitimate extension and a logically legitimate refinement of the long since well-known disposition to explain human history in terms of 'historical tendencies' and of 'historical forces'."

—Dr. Josiah Royce in Science, April 17, 1914.

Address Charles S. Boyer,
6140 Columbia Avenue Philadelphia, Pa.

THE MACMILLAN CO., Publishers New York

THE UNCAUSED BEING AND THE CRITERION OF TRUTH

By E. Z. DERR, M.D.

A profoundly philosophical work.—San Francisco Argonaut.

Of a highly philosophical character. The author reveals the weak points in Pantheism and Polytheism as these systems find expression in modern writings.—Springfield Republican. \$1.00 net.

Sherman, French & Company, Publishers
Boston

ASTRONOMY

By GEORGE F. CHAMBERS, F.R.A.S., of the Inner Temple, Barrister-at-law.

A popular outline of leading facts, which may be easily grasped by any fairly educated person who is disposed to give a limited amount of time and thought to the matter and who happens to possess a small telescope and a good opera glass. Pp. xxiv+335. \$1.50 net.

D. VAN NOSTRAND COMPANY,
New York City

THE ORIGIN OF THE EARTH

By THOMAS C. CHAMBERLIN

A new chapter in "the Story of the Birth of the Earth."
Third volume in the University of Chicago Science Series. Complete list sent on request. xi+212 pages, 8vo, cloth, \$1.50 net, postage extra (weight 1 lb. 6 oz.)

THE UNIVERSITY OF CHICAGO PRESS
Chicago, Illinois

STILES' NUTRITIONAL PHYSIOLOGY

By PERCY GOLDTHWAIT STILES, Assistant Professor of Physiology at Simmons College, Boston.

This new book discusses in a concise way the processes of digestion and metabolism. The key word of the book throughout is "energy"—its source and its conservation. 12mo 295 pages illustrated. Cloth, \$1.25 net.

W. B. SAUNDERS COMPANY

Philadelphia London

Method of sizing the pipes for low pressure steam heating based upon the loss of pressure per lineal foot. Four large tables and a few small ones. 4 1/2 x 6 1/2; 47 pp.; \$2.00 postpaid.

Losses of pressure per lineal foot for different coefficients of friction. 1 table, 50 cents postpaid.

P. O. Box 298., Chicago

School and Society

Under the title "A School Journal at Last" the *Newarker*, published monthly by the Newark Free Public Library, says:

At last we have a weekly journal devoted to the subject of education which the average intelligent citizen can read with pleasure and profit. It is not devoted to primary methods. It does not tell how to teach arithmetic. It is not too philosophical, or too theoretical, or too dismally practical. It is simply a sensible weekly journal which covers the whole field of education in an agreeable, rational and illuminating manner.

It is called *School and Society*. It is edited by J. McKeen Cattell. It is published by the Science Press, Lancaster, Pa., and Garrison, N. Y. This same press publishes, and this same editor edits the weekly journal called *SCIENCE*. *School and Society*, in its field, is as good a journal as *SCIENCE*, in its field, which is saying much.

Principals, assistant principals, high-school teachers, and the teachers in the higher grades can find a better source of information and enlightenment elsewhere.

The library at present takes one copy of this magazine. If teachers and others make requests for it, the library will take a number of copies and lend them, so desirable does it seem that a journal of this kind be widely read in our city.

A leading editorial article in the *New York Evening Post* begins:

With the opening of the new year an interesting addition was made to the already large list of American journals devoted to educational questions. *School and Society*, which forms the third periodical of somewhat kindred nature edited by Dr. J. McKeen Cattell—the other two being *SCIENCE* and *The Popular Science Monthly*—aims to combine the functions of a professional journal for those engaged in educational work and a medium of interesting information and discussion for "the wider public for whom education is of vital concern."

What strikes one, above all, in reading the early numbers of *School and Society* is the enormous range of the subjects which, within the past decade or two, have become live topics in educational discussion. Indeed, if it was the editor's purpose to produce this impression without a word of editorial flourish—for he adds nothing to the extremely brief announcement of purpose in the advertised prospectus—he has adopted an extraordinarily effective method of doing so in using as the initial article of the journal President Eliot's address at the inauguration of Dr. Finley as Commissioner of Education of the State of New York.

Heredity and Environment

in the

Development of Men

By EDWIN GRANT CONKLIN

Professor of Biology in Princeton University

"The lay reader cannot fail to be interested in the wonderful array of post-Darwinian achievements in biology which are here marshalled in such a clear way; and the biologist familiar with the detailed discoveries to which mere reference is made by way of evidence or illustration, will profit much by the survey of a whole field in well-balanced perspective. The general reader, who gets from current literature quite contradictory and often distorted views as to the undertakings and the possibilities of the eugenics movement, will here find a correct and sane inventory of both."—*Science*.

"The book is marked by sound judgment, firmness and clearness of treatment, and a vigorous buoyancy. It is to be strongly recommended to those who wish to understand the facts of human development in their relation to the larger problems of human life. The volume is well got up, effectively illustrated, and provided with a carefully selected bibliography and an unusually good glossary as well as a full index."

—*Nature*.

"We have great pleasure in commending the study of these instructive and suggestive lectures to all who are interested in the problems of heredity and environment as they affect the development of animals and man."—*The Lancet*.

"For those who desire real knowledge of the important subjects of heredity and environment, Professor Conklin's book is emphatically the one to read. In hardly another treatise can be found so clear, shapely and relatively simple an outline of the essential scientific facts, or so sound and inclusive a view of what the facts humanly signify."—*North American Review*.

This book has been adopted for use as a required text book or for collateral reading in the University of California, Agricultural College of Utah, Central Wesleyan University, Centre College, Colorado Agricultural College, Dakota Wesleyan University, Elmira College, Goucher College, Harvard University, Northwestern University, Ohio Wesleyan University, Princeton University, Syracuse University, University of Colorado, University of Illinois, University of Pittsburgh, University of Texas.

A Handbook of American Private Schools

The 2nd Edition revised and enlarged of the Handbook of the Best Private Schools.

Among the new features are a Complete List of Private Secondary Schools; new Educational Directories; a List of Secondary School Periodicals.

New Introductory Chapters, — Measuring Educational Results, the Year in Education; Review of Recent Educational Literature, etc., by Prof. Arthur O. Norton of Wellesley College, Prof. Clayton C. Kohl of New York University and others.

640 pages, round corners, crimson cloth, gold stamped, \$2.50

A Handbook of New England

Descriptive of Town and Country along the Routes of Automobile Travel, with Introductory Chapters.

768 pages, round corners, crimson silk cloth, gold stamped, \$2.50

PORTER E. SARGENT

50 Congress St., Boston, Mass.

Marine Biological Laboratory Woods Hole, Mass.

INVESTIGATION Entire Year

Facilities for research in Zoology, Embryology, Physiology and Botany. Seventy-six private laboratories, \$100 each for not over three months. Thirty tables are available for beginners in research who desire to work under the direction of members of the staff. The fee for such a table is \$50.00.

INSTRUCTION June 27 to August 7, 1917

Courses of laboratory instruction with lectures are offered in Invertebrate Zoology, Embryology, Physiology and Morphology and Taxonomy of the Algae. Each course requires the full time of the student. Fee, \$50. A lecture course on the Philosophical Aspects of Biology and Allied Sciences is also offered.

SUPPLY DEPARTMENT Open the Entire Year

Animals and plants, preserved, living, and in embryonic stages. Preserved material of all types of animals and of Algae, Fungi, Liverworts and Mosses furnished for classwork, or for the museum. Living material furnished in season as ordered. Price lists of Zoological and Botanical material sent on application. State which is desired. For price lists and all information regarding material, address

GEO. M. GRAY, Curator, Woods Hole, Mass.

The annual announcement will be sent on application to The Director, Marine Biological Laboratory, Woods Hole, Mass.

SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE

FRIDAY, FEBRUARY 9, 1917

The Philosophy of Geology and the Order of the State, Dr. John M. Clarke.

The Scientific Monthly

Entered as second-class matter October 1, 1915, at the post office at Lancaster, Pennsylvania,
under the Act of March 3, 1879

THE SCIENTIFIC MONTHLY is conducted on the editorial lines followed by THE POPULAR SCIENCE MONTHLY since 1900. It publishes as the THE POPULAR SCIENCE MONTHLY published, articles appealing especially to educated readers as opposed to purely popular matter intended for the public generally, and for such a journal THE SCIENTIFIC MONTHLY appears to be the more fitting name. The editorial management, publication department and typographical form are the same as have characterized THE POPULAR SCIENCE MONTHLY during the past fifteen years, and have made it an important agency for the advancement and diffusion of science.

CONTENTS OF THE JANUARY NUMBER

Adventures of a Watermol. Professor H. L. Fairchild.
Probable Relations of Climatic Change to the Origin
of the Tertiary Ape-Man. Professor Joseph Barrell.
The Ways of Pangermany. Chancellor Davis Starr
Jordan.
The Present China. Dr. Alfred C. Reed.
Instinct and the Rational Life. Professor Harry Beal
Torrey.
The Food Plants of the Ancient Hawaiians. Professor
Vaughan McCauchey.
Fossil Hunting in Texas. Dr. Edward L. Troxell.
The Progress of Science:
The Convocation-week Meeting and Columbia
University; Program of the Meetings; Scientific
Items.

CONTENTS OF THE FEBRUARY NUMBER

The Miriamites. Dr. Hubert Lyman Clark.
The Evolution of Flowers. John J. Lovell.
The Electromagnetic Theory of Light. Professor
David Vance Guthrie.
The Experimental Method and Sociology. Professor
F. Stuart Chapin.
The Luck Element. Professor A. G. Keller.
Mental and Muscular Work. Dr. James Frederick
Rogers.
Milk, Sanitary and Otherwise. Dr. James Waddell.
Geology and Public Service. Dr. George Otis Smith.
Adventures of a Watermol. Professor H. L. Fairchild.
The Progress of Science:
The New York Meeting of the American Association
and the Organization of Science; Dr. Campbell's
Presidential Address on the Nebulae before the
American Association; Scientific Items.

From Scientific Research to Elementary Educational Work—there are models of the

Bausch & Lomb Microscopes

peculiarly suited to these extremes and all intermediate requirements. Behind every instrument stands the experience of sixty years in the manufacture of optical products, and the most expert optical staff in the country. The Bausch & Lomb nameplate insures accuracy and durability—let your choice of a microscope be decided by the special restrictions which YOUR work imposes.

Model F2 (illustrated) for example, has slow enough fine adjustment for higher powers and allows unusual space for object manipulation. The base and arm are finished in our new crystal black, unusually durable and reagent-proof. Price \$31.50. Other models moderately priced.

Send for our illustrated price list of other models and accessories with full descriptions.
